

Konto und API-KEY anlegen

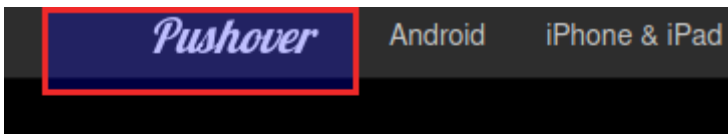

Beschreibung:

Um Pushover notifications nutzen zu können braucht man ein konto dort. Die App kostet einmalig 5 USD Dollar pro Plattform (iOS, Android, Desktop) und ist zu verschmerzen.

Anmelden unter <https://pushover.net/>

Registrierung:

Nach anmeldung und Freischaltung durch Emailbestätigung, wieder einloggen und auf das Pushover logo klicken.

To send a notification to your device, you'll first need to install the app on your iOS or Android device.

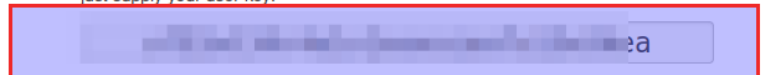

Oben rechts steht unser User Key den brauchen wir auch später, also den auch im Passwortsafe speichern

Push a Notification

To send a notification to your device, you'll first need to [install the app](#) on your iOS or Android device.

Your User Key

To receive notifications from a Pushover-powered [application](#), service, or website, just supply your user key:

To receive Pushover notifications from e-mails, send to:

Danach auf Create an Application/API Token klicken

You do not have any enabled quiet hours.

Your Devices [\(Add Phone, Tablet, or Desktop\)](#) [\(View Your Licenses\)](#)

No devices registered. Install our [Android](#) or [iOS client](#) on your device to get started.

Your E-Mail Aliases [\(Create an E-Mail Alias\)](#)

Address	Settings
 hm4dm1mx2t@pomail.net	Deliver to all of your devices (default)

Your Delivery Groups [\(Create a Group\)](#)

No delivery groups created yet.

Your Custom Sounds [\(Upload a Sound\)](#)

No custom sounds uploaded yet.

Your Applications [\(Create an Application/API Token\)](#)

Nun einen Namen und eine Beschreibung vergeben.
Die AGB akzeptieren und auf Create Application klicken

Create New Application/API Token

To start pushing notifications with Pushover, you'll need to create an Application and get a unique [API token](#), which you can do here. Each website, service, application, plugin, etc. may only be registered once and each application can send 10,000 messages per month for free. Additional message capacity may be purchased after creating an application. For more on monthly limits, see our [API page](#).

Application Information

Name:
*This name should be short (20 character maximum), such as "Nagios", "Adium", or "Network Monitor".
If messages are sent with no title, this name will be displayed.*

Description:

URL:
If this is a public app/plugin, you can include a URL to point to a homepage, Github repo, or anything else related to the app.

Icon: Keine Datei ausgewählt.
To customize your app's notifications, upload a 72x72 icon in PNG format (transparent background preferred). Any images not 72x72 will be resized.

By checking this box, you agree that you have read our [Terms of Service](#) and our [Guide to Being Friendly to our API](#). Only one API token may be registered per source and you agree that this token will not be used to circumvent our free usage allowance.

Nun bekommen wir unseren API KEY, diesen kopieren wir uns zum Beispiel in einen Passwortsafe
